

Cigar-shaped Spacecraft Coming in Earth Alliance Disclosure Plan

Michael Salla, JP

JP Update 41 – Cigar-shaped Spacecraft Coming in Earth Alliance Disclosure Plan

<https://rumble.com/v62xbxk>

On December 14, 2024, a retired US Army serviceman, JP, was taken to an underground facility in Tampa, Florida, where he was exposed to three cigar-shaped spacecraft that are included among many that are about to be revealed to the general public by 'White Hats' in the US military and other national military forces that make up the "Earth Alliance." The craft will be the next phase in the release of advanced transmedium spacecraft, aka drones, currently being witnessed in the US and worldwide.

In his update, JP describes the size of the cigar-shaped craft he witnessed in their Florida hanger, and how they can easily camouflage themselves by using a stealth technology that mimics the surrounding environment. JP describes the plan to launch the spacecraft and allow them to be witnessed, thereby preparing the general public for the even larger craft that will be unveiled in the months ahead. JP was told the release of these medium-sized

cigar-shaped spacecraft was part of an unfolding disclosure plan.

DR. SALLA: It is December 20 and it is my great pleasure to welcome JP back to ExoPolitics today. Welcome JP.

JP: It's a pleasure to be here to bring you more information and to share the love and these beautiful, beautiful experiences.

ANNOUNCER: You're listening to ExoPolitics today with Dr. Michael Salla. Your source for the uncensored truth regarding the human extraterrestrial, global and political agenda. Click the like button and subscribe to this channel. And now, here is Dr. Michael Salla.

DR. SALLA: Well it's been more than a month since we did an update and I think you had something that you want to report on. For those that don't know, JP retired from the US Army in the end of August of 2024 and right now he is officially retired and he is still being exposed to some information about the covert world of secret space programs and extraterrestrial contacts. So JP, why don't you tell us what was the latest experience you had?

JP: The latest experience doc, I was heading towards Tampa. In Tampa, I've got family that live there. And I was driving over there and it was six hours where I'm from. So I got there and I was visiting my mom. She lives in Tampa and I got there and at night I got there like around four, but when I was starting to go to sleep, I got like the horn of my car went off. So the alarm of my car went off like around nine or ten o'clock.

So when I heard the horn of the car, I went outside and I had just sneakers and jeans and I got outside because in Tampa they sometimes you got to be careful with the people that live around the Bay Area.

I went outside and I was locked and loaded and I see a car that was parked in the front and I see a guy looking at me and he's like, "oh, come over here". I'm like, oh man, okay. So I'm here with an accident. Hey, did you just try anything with my car? Did you do anything?

He's like, "Yes, I kicked your car" and I'm like, why are you kicking that car? He's like, "Oh, because I won't ever get your attention."

And I was like, oh, okay. So he's like, "Get in the car." And I'm like, I looked at him and he tilted his head and then I know like when they start tilting their head, I know where they're from, where they're coming from when they're asking me to get into the car.

So I got into the car and I have no shirt on and I said, hey, I got into the car and I said, hey, I really need a shirt. He said, "No, we got you covered." So it's weird because a guy in the front, he gave me, he gave me one of his shirts. It's like a jacket, but you can close it up and it was black and it was made of metallic material in the inside. I don't know if you know what tin foil hats are or helmets are, but it was made like a metal substance inside in between the fabrics to protect you from different things.

So I thought I had that on and we started driving towards like a place where I used to take pictures. It's close to a particular base.

DR. SALLA: Yes, just for people that may be unaware of that, but in 2017, JP was living in Tampa and he took dozens of photos of different types of craft, flying triangle-shaped craft, rectangle-shaped craft, even cigar-shaped craft in that Tampa Bay area. And they were released on exopolitics.org and that was near MacDill.

JP: Yes. Well, they took me to this, it looked like a library, right? I don't know, like an old library and there was a lot of books. We parked and I went into this building that looked like a library and I'm looking around like this and he says "Just follow us".

JP: And I'm like, how do you guys know? "We know always where you're at. Don't worry about that. We will always be making sure you're safe and monitoring everything that you do". I guess there, I felt a little bit protected.

They were telling me, hey, don't walk towards there. Don't like be careful. Like once I'm under their wing, they protect you. Once you're under their wing, they protect you. It doesn't matter who you are, but if you feel that protection, you feel like they'll try to protect you from anything that you see when looking around, similar to what Secret Service do.

And you see them like really protective and like protecting me. And I'm like,

oh man. I wonder where we're going.

So they took us out another door from the back of this building and we got in a different car. So they left that car parked and we got into a white minivan type of car. So we got into that car and the van goes to the side.

There were no windows. I don't know what to memorize the turns because you could tell with the gravity pull of the car, when you're making a right or left. We made a left for like five minutes. And then we made a right like for 10 minutes. And then I started feeling going down like into a ramp.

So I didn't know where I was going. It's five minutes out. I think the van was going like 35 miles per hour according to the feel of the wheels of the bumps hitting the road. Ten minutes in and then we started hitting the ramp.

And then the ramp, it was another like 10 minutes. So a total of 25 minutes of travel from the place where we entered to go to the other vehicle. And we parked and "You stay, okay, you just stay here really quick. We're going to just scope the area." So they started checking the area and they opened the door and said, "Okay, come with us and wear this hat."

Some other guy gave me a hat. And this hat and when I took it, I looked in the inside and it had like a metallic ring around the hat. So it looks like a regular hat that has a metallic of the same material that the shirt had.

So it had a metallic like gel substance. It looked like metal, but once you put on that hat you think better, you feel better, you analyze everything better.

Like everything that is coming in waves stops automatically. So you feel like that empty calm state and you think like precise, like you know the answers precise, you start talking in a better way. It was the technology or the material that I put on.

So I had a shirt that in between had a metallic substance that you could feel that when you do like this to it, it feels like a grain and you could feel like it's heavier like if it's a metal and then they gave me a hat to protect me from whatever's coming in and for me to think straight.

So they gave me that hat for them. I looked like one of them. I just had jeans on. So the same thing apparently the guy had another jacket in the back of the van. And it was a total of two guys there in the car with me.

So we entered and it looked like a big, big, big parking lot. Like an airport or like a building that we were at. You didn't see any other cars on the side are all minivans. And right there I was looking around analyzing.

And then I said, this must be a big building because the structure was huge. Instead of being closer together, the structure that holds the building was farther away. So I thought this is a big building. This is a place that is huge.

So it looked like a parking lot, but it had a, you can see on the floor it had a green level and it had a red level and the center was blue. And I saw that in the reminding me, the place where I went when I saw the pilots taking off with the Nordics, how it was color coded as well with those same colors.

And we saw stairs that went down. I was trying to look for an elevator, but there was no elevator. So we went down these stairs and I think we went one, two, three, four, five, like a total six, four floors down on the stairs.

And we saw when he entered the door, I saw like three some ol' looking crafts. Huge. It was like 50 yards. That's how big the area was. It was huge. 50 yards in diameter. They look like submarines, but the hatch was in the bottom, like the opening and it came down like that, like the stairs.

And they were lifted up with two metal pipes and it was like on top of the metal pipes. I'm like, how, how would they move this? When I started saying that, how would they move this? I saw in the distance, another one and it was turning on. And the front part has like little balls and the back part has like little balls and they started glowing like a blue, like a blue white pulsing. And I'm like, what the heck is that?

DR. SALLA: When you say that, when you say the end of it had these balls. Are you talking something like a radar?

JP: I'm talking about like, it looked like, like a Tesla, like thing. It was emitting like a pulse of electricity that was glowing blue and white and it was

pulsing front and back.

DR. SALLA: It was kind of like steady discharge?

JP: But it was just, it looked like an orb, like it stayed like those balls that when you touch it and it electrifies your hands. So it stayed, it doesn't spread out. It stayed, like it created like an aura and you can see the glow.

And I asked the guy, I said, Hey, these are cool ships.

He's like, "Yes, they're awesome. They're amazing". And I'm like, I already said that was a ship.

So they knew, I knew what it was. And I'm like, why do you guys have me here? He's like, "Oh, they just want you to see this and also to give out the information that these types of cigar ships are going to be flying all over the place.

And they told us to pick you up and show you this". And I said, they who they said, "I know you know about it, who they are. They just told us to pick you up and show you these three ships for you to see it for yourself."

I said, can I take pictures? Can I take a video of it. He looked at me and he tilted his head. He said, "No, but we do want you to share that these ships are going to start showing up around the world. And they're different shapes and sizes. Some of them come from not this world and some come from certain governments. So we just want the public to know that these ships are going to be showing all over the place".

DR. SALLA: Can you describe a little more about how the ships looked and their size? I mean, you mentioned 50 meters long. So how high was it?

JP: It was a size of like two, like two school bus on top of each other.

DR. SALLA: I see.

JP: So 12 13 plus 13 as a total of 26 feet. Okay. And it's as wide also like 26 feet and the color and the color was like a blackish gray. But you can see it reflecting from the floor as well. So it was a reflecting. It was like a mirror

similar to like a mirror color similar to the same ship that I photographed in Orlando that was reflecting the trees.

DR. SALLA: All right.

JP: That the Nordic picked me up in. And this ship was different from the one I took a picture of over there in Tampa when the orbs were coming out of it. And I took that video and then picture of it.

DR. SALLA: Yes, we have that picture. That picture actually was included in the Tampa Bay Times. They ran a story about it. So these orbs are similar you're saying to what was seen then in terms of the color.

JP: Yes. Similar color to what we saw on that ship. And also the glowing part was I think I took a video of it in Orlando and you posted as well I took it with my wife and we saw it flying and was a cigar-shaped ship. And it was flying away from the car and all that. And I remember sending you that video as well. And it was a similar same ship of that size.

DR. SALLA: And the bottom was the only place where you could kind of enter and leave that craft that they would be kind of hatched at the bottom unlike a submarine where it's on top.

JP: Yes. So it has a two metal holes holding it. So I don't know that thing looks so heavy. I don't know how it's put on top of there, not unless it floats and it flies. It parks there. So that was a beautiful sight seeing these ships.

Then they asked permission to take me inside, but the other guy said now he can't go inside because I was asking, Hey, can I go inside to check it out to see if it looked like the other ship I went into that had a corridor when they started taking like took blood out for me. I don't know if I send you those pictures of them taking out blood and you can see the mark where they took it.

DR. SALLA: Was that the one in Tampa?

JP: Yes, that was one in Tampa.

DR. SALLA: Okay. Yes, that we again that was you took some pictures of that craft. It was a rectangle-shaped craft and you sketched the interior of a long, long corridor and you said that there were like weapon consoles on the on the sides as you're walking down and you describe the patch of the operative on that craft and we identified it as air force special operations, the air command.

JP: Yes, I think we let that go prior of the Trump, the first part, Trump administration. Yes, it was 2017.

DR. SALLA: That was October, 2017. Yes. When you were taken on that that rectangle-shaped craft.

JP: So I was taking in with my ears and just looking with my eyes left to right and I was like, wow, okay, because, I have seen them, but I haven't like experienced the turning on of it and experienced, you feel like also like a consciousness, like trying to communicate with you when it turns on and like asking you questions about your life and you answer it back with your brain and I think this hat enhances the communication also with these ships and I guess it's like a type of AI or a type of technological connection that you have with it. But you feel like if it's, if it knows you already, like it goes into your like memory and knows everything about you, knows what you like, what food you like and knows the way you are, the attitude, what questions you're going to ask. It's an amazing technology when these ships interact with you. And I'm sure that's what the pilots experience with the Nordic ships

DR. SALLA: Were you allowed to touch the ship.

JP: Oh, no, I did not get to touch the ship. Last time I touched the ship back, I closed my eye and I ended up back in the farm. So I keep my distance when I come to touching the ship again.

DR. SALLA: And so there were three ships and they were kind of like all parked or arranged by side by side.

JP: But the one in the center was turning on and it was beautiful. It was amazing. It's like, yes, it was a beautiful experience. It's like.

DR. SALLA: And were there other kind of, I mean, 50 meters long. I mean, that's a pretty, pretty long craft. Were there technicians or soldiers around any of the craft.

JP: It was only us three. I think it was arranged. I think they already knew I was heading over there. So they had everything arranged already to just show me this. And he had said that they're going to start showing up all over the place, these bigger craft, not just these orbs.

DR. SALLA: OK, so when they're turned off, they're kind of like a dark gray. But when they start getting activated and they're lighting up, can you describe it?

JP: They turn into like a metallic color that looks like a mirror. It turns into a mirror. So I guess when it's in the cloud, it mirrors the cloud off of it and it camouflages it. So depending how high it is from the cloud, it mirrors the cloud. So it looks like a cloud when it moves is mirroring the cloud. So all you see is like a type of shadow. You don't see completely the ship itself. So it's nice.

DR. SALLA: It's kind of like a stealth camouflage skin.

JP: A solid stealth, yes, type of skin that has and it's really smart of controlling the lights. So rounding and shadow surrounding as well. So you look at it. You look at the whole floor instead of the floor and the ship. But you could tell the ship because the ship on top is mimicking what is on top that was dark.

So when I saw the ship in front of me, it had, if you look at the animal kingdom, the chameleon is really good at doing that mimicking its surroundings. And I'm sure scientists have studied the animal kingdom with different types of cuttlefish, octopus, and other animals.

The majority of things that we have, we also look at the animal kingdom for ideas like the spider, like other animal species that can help us enhance whatever it is that is military.

And on top of that, we got the ETs sharing technology and also doing the

same thing, looking at animal species, see what they can get from the animal species to implement it in their technology. And they do this world by world as well with different types because our animal kingdom or animal species in our world is really unique. They have a lot of different abilities similar to like superheroes.

So it's amazing the animal kingdom and what technology we can branch out from studying the blood and also the animal kingdom where they carry in itself.

DR. SALLA: So, this kind of technology, it sounds very similar to an invisibility shield that I remember reading DARPA or invisibility metal that DARPA had developed. And, and so, yes, just as you were saying it just mimics the surroundings.

So this craft, when it's activated and floating up, if it wanted to, it could just like look like it disappeared because it would just, the metal would reflect the surroundings. So, all of the particles, the particles that is around it, it mimics.

JP: So, so anything like if there's a fire smoke, it mimics those particles. So it mimics the micro particles around it. So it makes it disappear.

DR. SALLA: Okay. But if it obviously it, if that, if those craft want to start appearing all over the United States and around the world, so people could see it what would people see? Would they kind of see like a smooth mirror like ship up there or like dark gray.

JP: Like I took that the Tampa Bay Times shared.

DR. SALLA: So they'd see like a dark gray type of ship up there.

JP: And people are going to get pictures, all videos and pictures of these craft. And I think this is going to be the beginning also of other governments being scared.

DR. SALLA: So, so this craft just to be clear, it's not an extraterrestrial craft. It belongs to the Secret Space Program.

JP: I'm going to say not, it's an international type of thing. It's not just us so, and it's there's technology there that it does come from extraterrestrials. Yes.

DR. SALLA: And the facility where these three cigar-shaped craft, submarine looking type craft were being kind of kept. Can you describe that more? Was it like a hanger? What was the look?

JP: It looked like a big parking lot. But when we went down the flight of stairs, like six floors, how many feet? It was the same size of the craft. Like when you enter this room, the height that you see was the six floors. So it's right under the parking lot, like you go down the stairs and then you go in and it's a big room. So the structure was huge because the metal, the concrete that hold the building was really separated. So it looked like a big, like if it was carved or something like that.

DR. SALLA: Okay, so kind of like an underground car park. Just like if you went to big shopping mall, there's a big underground car park.

JP: It looks like a subropolis. I don't know if you've ever heard of that over there in, I think is it Illinois's. It's called subropolis. It looks similar to that. It's a place where you can look it up later. And it's and I'll send you the link. It's a place that they built underground. And it's huge. And it looked similar to the to subropolis.

DR. SALLA: So, so these two guys that picked you up and dropped and kind of like showed you that that facility in the three craft in that be kind of underground car park thing. They were they were briefing you or telling you that these are going to these cigar -shaped craft are going to be seen all over the world soon. And that this is all part of preparing people for what?

JP: I assume it is contact.

DR. SALLA: Okay, contact. All right, so they're going to show these craft, which belong to a corporation, a government agency or the Air Force. They're going to start showing those because what they don't want people to feel uncomfortable with seeing big cigar shaped craft up there.

JP: They want people to feel comfortable. Yes, about these ships, but there's

going to be a lot of mixture of things happening during this time. They're going to choose this time really, really careful. We got that. Project Blue Beam that everybody's talking about. We have to be careful. We got the drones. We have to be careful. But it is cigar and TR3B looking ships that are going to start floating around and people are going to. I think already we can see that people are already taking a lot of videos and taking a lot of pictures and we said four weeks ago or maybe a month ago that this was going to happen. When the Nordic came to my house and you told me, Hey, we're going to start revealing ourselves. The next week that all that started happening and we're like, wow, that's confirmation of what he said. What the Nordic told me was right.

DR. SALLA: So when these crafts start revealing themselves, I mean, they're obviously not extraterrestrial craft, but they're going to be part of this disclosure process that will result in extraterrestrial craft, like the Nordics revealing themselves. So, so will these craft, will the government or someone come forward at some point and say these craft are actually ours?

JP: I don't think yet that's going to happen. I'm going to keep that closed up because of security of our country for now. But I think it's going to start upgrading to smaller crafts, regular-sized craft cigar-shaped craft. And then it's going to keep getting bigger until maybe the arks show up and people are like, Holy crap, the arks are here.

So I think it's a psychological process, a process that they do is little-to-biggest just to normalize people with the ships. I guess that's the route, maybe that's what they want to do.

DR. SALLA: I see. So, like right now, people are seeing these kind of car size, they calling them drones all over all over America, especially the East Coast, but that's going on now. So soon it's going to change and they're going to see these bigger cigar-shaped craft, 50 meters long. And after that it will get even bigger with the space arks or the mother ships.

JP: So it's the politics around the world is also screwing a lot of things up, doc. You and I know that. So it also depends on the politics around the world and what happens with every administration around the world, because it's a team effort. So if it's going to happen, it's going to happen.

And it's going to happen automatically or if it's going to drip drop away, like it has been doing it. So that it'll be sad if they decide to drip drop away and elongate it a little bit more. But that's what is looking like, they want to elongate the process of sharing all this, I guess. I wish I had control, but we don't have control.

DR. SALLA: So, so you were told that these cigar craft are going to soon start being seen around the world. Now we're talking about after the Trump administration begins, like after January 20 that this is going to happen.

JP: Can't say that doc? I'm sorry.

DR. SALLA: Okay. All right. No problem. Okay. Well, so yes, anything else you want to say about this. I mean, I guess afterwards what happened? They just returned you home.

JP: After that, they gave me something to eat. I ate it. You know, I ate everything they gave me. So it made me feel like not dizzy. But like not blacked out, but I closed my eyes. I open it. I was in front of my house. And he says, "Oh, you're back". And I woke up inside the parking lot where I live, where my mom lives and it was still night. And when I looked at the clock, I got back like around three A.M..

DR. SALLA: And when did this happen? I mean, today's December 20. When did this happen?

JP: It happened like Saturday.

DR. SALLA: Saturday of last week. So we're talking about the 14th. And you got the green light from the guy, the officer at the base where you were stationed.

JP: Oh, he's not an officer, but he is a high ranking dude. Yes.

DR. SALLA: Okay. All right. Perfect. So. Any final words you want to say to the audience before we finish this?

JP: I'm really excited for what is to come. We just have to have a same

mindset of love frequency. And I'm sure that if we all unite and send out this love and care about each other I think we should get what we want. The truth is going to come out. It's like a lion. Right, Doc.

DR. SALLA: Right. Well, right.

JP: It's going to come out regardless. So and hopefully, I hope other service members that served, they're protected. Just share what your experiences are and all that. This is the best country where I live, doc, and I want people to know that. And I love this country from the bottom line. I will protect it with my heart. And if I'm being told to say this, it's for a reason. People need to know. And it's going to be amazing times. And we're going to move forward together and united and we will. The light will win. We will win and everything is going to be okay.

DR. SALLA: And thank you for actually reminding us that you've been asked to reveal this, that this is not like a whistleblower. That you are like someone that's connected with the inside covert world and they're asking you to reveal this, but in a way. Where I guess it's not too specific, but people can get an idea, a general idea.

JP: Yes, that's a general idea and also just keep me in prayers, in the high vibratory, because there's a lot of things happening between. Let's see how 2025 starts right? It's going to be amazing and we're going to prosper. This is going to be the golden age.

DR. SALLA: Well, this is very appropriate because as you are actually one of the panelists for this December 28 webinar, where we're going to be talking about the exopolitical state of the planet, and you will be. So this topic is very much in line with that. So, yes, anything you want to say about this upcoming webinar on December 28. You're going to be one of the panelists and will be getting you to answer questions, but this what you just revealed is very much along the lines of the content of what we're going to be discussing.

JP: Yes, yes, I believe it's going to be an amazing webinar is going to might have more information in the webinar that I can share. And I'll probably have my lower part with something covering my face, but with this off. So little by

little. Yes, Doc. I do want to take off this beautiful helmet. Let's see what happens in this webinar. I'm going to take the lower part of this off and just cover my face with a type of blanket or something, but you can see a little bit of the structure of my face.

DR. SALLA: Okay. We look forward to that. And of course, people will be able to hear you more clearly, because this will be a two-hour panel that you'll be on. You're wearing a helmet now, because it has helped maintain your anonymity, but in the future, the plan is that you're going to, I guess, just reveal yourself. You've pretty much decided that this is what you're going to do.

JP: Reveal myself and get subpoenaed.

DR. SALLA: Okay, there we go. When you reveal yourself and your name, then you could actually be called upon to appear before the Congress and reveal what you know.

JP: Hopefully not, but that's the case whatever it is to bring the beautiful truth and the beautiful technology and the beautiful peace and love to humanity.

DR. SALLA: Wonderful. Well, I want to thank you, JP, for your courage and for your service to your country and this is a very important revelation that we are going to very soon start experiencing some much larger craft, but this is actually being planned. It's well thought out and people are being prepared for it. So thank you for playing your role in all of that.

JP: Yes, yes. And everybody, thank you. I think the public is going to be excited.

DR. SALLA: Thank you again, JP.
